1. Introduction to Outlook

Microsoft Outlook is an application used to manage:

- Emails
 - Contacts
 - Calendar and meetings
 - Tasks
 - Email folders and organization
-

2. Outlook Compose – Creating a New Email

Compose means creating a new email message.

Steps to compose an email

1. Open **Outlook**.
2. Click **New Mail** or **New Email**.
3. A new message window will appear.
4. Enter the recipient's email address in the **To** field.
5. Enter a suitable **Subject**.
6. Type your message in the message area.
7. Add an attachment if required.
8. Review the email.
9. Click **Send**.

Basic email structure

An email normally contains:

To: Recipient's email address

Cc: Additional visible recipients

Bcc: Hidden recipients

Subject: Topic of the email

Message: Main content

Attachment: File sent along with the email

Signature: Name/contact details at the end

3. To, Cc and Bcc

Understanding **To**, **Cc** and **Bcc** is very important when sending professional emails.

To – Main Recipient

Use **To** for the person or people who are expected to **take action or respond** to the email.

Example

You are submitting an assignment to your teacher.

To: teacher@example.com

The teacher is the main recipient.

Cc – Carbon Copy

Cc means Carbon Copy.

Use **Cc** when you want someone to receive a copy of the email for their **information or awareness**, but they are not the main person responsible for the action.

Example

You send an assignment-related email to your teacher and want your class representative to be aware of it.

To: teacher@example.com

Cc: classrep@example.com

Important point

People in **To** and **Cc** can normally see each other's email addresses.

Bcc – Blind Carbon Copy

Bcc means Blind Carbon Copy.

Use **Bcc** when you want to send a copy to someone **without revealing that recipient's email address to the other recipients**.

Example

You are sending the same announcement to a large group and don't want all recipients to see each other's email addresses.

To: your own email address

Bcc: recipient1@example.com, recipient2@example.com, recipient3@example.com

Important point

Recipients in **Bcc** are hidden from other recipients.

Easy way to remember

Field	Meaning	Main purpose
To	Main recipient	Action/response
Cc	Visible copy	Information
Bcc	Hidden copy	Privacy

Common mistake

Do not put everyone in **Cc** just because they need to receive the email.

Ask yourself:

"Does this person need to take action, or do they only need to know?"

4. Sending an Email

After composing an email:

1. Check the **To** address.
2. Check **Cc/Bcc**, if used.
3. Check the **Subject**.
4. Read the message once.
5. Check spelling and grammar.
6. Make sure the correct attachment is included.
7. Click **Send**.

Before clicking Send – Remember

R-S-A-C

- **R** – Recipients
- **S** – Subject
- **A** – Attachment
- **C** – Content

5. Reply to an Email

Reply is used to respond to an email.

When you click **Reply**, Outlook normally addresses the response to the person who sent the email.

Steps

1. Open the email.
2. Click **Reply**.
3. Type your response.
4. Add an attachment if necessary.
5. Review the message.
6. Click **Send**.

Example

Original email:

Please submit your assignment by Friday.

Reply:

Dear Sir,
I will submit the assignment by Friday.
Regards,
Rahul

6. Reply All

Reply All sends your response to the sender and the other visible recipients of the original email.

Use Reply All when:

Everyone included in the conversation genuinely needs your response.

Avoid unnecessary Reply All

For example, if a teacher sends an announcement to 50 students, replying “**Thank you**” to everyone may create unnecessary messages for all 50 students.

Remember

Reply → Sender

Reply All → Sender + relevant visible recipients

7. Forward an Email

Forward is used to send a received email to another person who was not originally included in the conversation.

Steps

1. Open the email.
2. Click **Forward**.
3. Enter the new recipient's email address.
4. Add your own message if necessary.
5. Check the forwarded content and attachments.
6. Click **Send**.

Example

Your teacher sends you information about a seminar.

You want your friend to know about it.

You can **Forward** the email to your friend.

Important

Before forwarding an email, check whether it contains:

- Private information
 - Personal information
 - Confidential attachments
 - Information that should not be shared
-

8. Delete an Email

Deleting an email removes it from the current folder and normally moves it to **Deleted Items/Trash**.

Steps

1. Select the email.
2. Click **Delete** or press the **Delete** key.
3. The email moves to **Deleted Items**.

To recover a deleted email

1. Open **Deleted Items**.
2. Select the email.
3. Move it back to the required folder.

Important folders

Inbox → Received emails

Sent Items → Emails you have sent

Drafts → Unfinished emails

Deleted Items → Deleted emails

Junk Email → Suspected unwanted/spam emails

9. Adding Attachments

An **attachment** is a file sent along with an email.

Examples:

- Word document
- Excel workbook
- PowerPoint presentation
- PDF
- Image

Steps to add an attachment

1. Create a new email.
2. Click **Attach File** / the paperclip icon.
3. Select the required file.
4. Click **Insert/Open**.
5. The file will appear in the email.
6. Check that the correct file has been attached.
7. Send the email.

Example

Subject: MS Office Assignment Submission

Message:

Dear Sir,
Please find attached my MS Office assignment.
Regards,
Rahul

Attachment:

Rahul_MSOffice_Assignment.docx

10. Professional Email Formatting

A professional email should be clear, polite, concise and properly formatted.

Recommended structure

1. Subject

Clearly state the purpose.

Poor:

Important

Better:

Submission of MS Office Assignment

2. Greeting

Use an appropriate greeting.

Examples:

- Dear Sir/Madam,
- Dear Professor,
- Dear Mr. Sharma,
- Hello Rahul,

3. Opening

Briefly explain why you are writing.

Example:

I am writing to submit my MS Office assignment.

4. Main message

Provide the necessary information clearly.

Use short paragraphs or bullet points where appropriate.

5. Closing

Examples:

- Regards,
- Best regards,
- Thank you,
- Sincerely,

Then add your name.

Example of a professional email

Subject: MS Office Assignment Submission

Dear Sir/Madam,

I am submitting my MS Office assignment for your review.

Please find the completed assignment attached to this email. Kindly let me know if any corrections are required.

Thank you.

Regards,
Rahul Sharma

Professional email checklist

Before sending, check:

- ☐ Meaningful subject
- ☐ Correct recipient
- ☐ Appropriate greeting
- ☐ Clear message
- ☐ Proper spelling and grammar
- ☐ Correct attachment
- ☐ Professional closing

11. Searching Emails

When you have many emails, manually looking through the Inbox can take a lot of time.

Outlook provides a **Search** feature to find emails quickly.

You can search using:

- Sender's name
- Email address
- Words in the subject
- Words in the email
- File/attachment-related terms
- Other available search filters

Basic steps

1. Click the **Search** box.
2. Type a keyword.
3. Review the search results.
4. Open the required email.

Example

Suppose you received hundreds of emails and want to find an email containing:

MS Office Assignment

Search for:

MS Office Assignment

Outlook will display matching messages.

12. Creating Folders

Folders help you organize emails and keep the Inbox manageable.

Example folder structure

Inbox

TEXT

- |
- |— College
 - |— Assignments
 - |— Exams
- |
- |— Projects
- |
- |— Personal

Steps to create a folder

1. In the folder/navigation area, locate your mailbox.
2. Right-click the appropriate location or use the **New Folder** option.
3. Enter a folder name.
4. Press **Enter** or save the folder.

Example

Create:

MS Office

Then move all Outlook-related practice emails into this folder.

13. Moving Emails into Folders

Method 1 – Drag and Drop

1. Select the email.
2. Drag it to the required folder.
3. Release the mouse button.

Method 2 – Move

1. Select the email.
2. Choose **Move**.
3. Select the destination folder.

Why use folders?

Folders help you:

- Find emails easily
 - Keep the Inbox organized
 - Separate personal and academic/work emails
 - Store important messages
-

14. Practical Classroom Exercise

Complete the following exercise in Outlook.

Task 1 – Compose

Create a new email.

To: Your classmate

Subject: Outlook Practical – Your Name

Write a short professional message.

Task 2 – Cc and Bcc

Send an email using:

To: Classmate 1

Cc: Classmate 2

Bcc: Your own email address

Observe which recipients can see the other addresses.

Task 3 – Attachment

Attach a Word document to the email.

Check the attachment before sending.

Task 4 – Reply

Open an email you received and click **Reply**.

Write a suitable response.

Task 5 – Forward

Forward an email to another classmate.

Add a short explanation before forwarding.

Task 6 – Delete

Select an unnecessary email and delete it.

Open **Deleted Items** and locate the deleted message.

Task 7 – Search

Use the Outlook Search box to find an email using a keyword from its subject or message.

Task 8 – Folder

Create a folder:

MS Outlook Practice

Move your practice email into this folder.

15. Quick Revision

Email Actions

Compose → Create a new email

Send → Send the email

Reply → Respond to the sender

Reply All → Respond to all relevant visible recipients

Forward → Send the email to another person

Delete → Move the email to Deleted Items

Recipients

To → Main recipient

Cc → Visible copy

Bcc → Hidden copy

Files

Attach → Add a file to an email

Download → Save a received attachment

Organization

Search → Find emails quickly

Folder → Organize emails by location

A well-managed Outlook mailbox should be **clear, organized, searchable and professional.**
